

URGENT: United States --- Clear for Takeover?

To all County Sheriffs:

We've got UN foreign troops on American soil. We've got rampant government corruption handing US tax dollars to international corporations. We've got a private agency with questionable foreign ties assuming police duties in the town of Hardin, Montana. We've got the UN and their arm the WHO manufacturing a worldwide pandemic as an excuse to deploy their bioweapon vaccine. We've got road blocks, microchip bracelets and quarantine camps to detain those who resist the lethal injection and we've got the global bankers poised to pull the plug on the banks triggering a full blown economic collapse any day now.

Everything is in place to throw it all into chaos, institute martial law and quickly swoop in and take it all. There seems to be only one thing that could stop the complete a total takeover of These Great United States right now and that is YOU!

Your willingness to recognize the incredible powers you have to ensure the global bankers do not get away with their plans of a total and complete takeover of the US are what can stop these plans in their tracks. US citizens are waiting for you to call on them and enlist them in their patriotic duty of resisting a foreign or domestic aggression. This does not have to incur violence but rather a mass non-compliance that will make it impossible for them to take over our lands by rounding everyone up into quarantine camps. Yes, the swine flu "planned demic" as many refer to it, is all part of the game. There is already a mass uprising against this as many are innately sensing the dubious plans that are far more sinister than we dare reveal in this fax letter.

Many Sheriffs are already on board. If you are one of them, "Thank You!" Sheriff Mack is certainly one of them and his brilliant booklet "County Sheriff: America's Last Hope" has been specifically uploaded for you to read at **www.CallingAllSheriffs.info** In addition, you will see a short video message directly from Sheriff Mack, an official Oathkeeper of oathkeepers.org regarding the issue of force vaccinating the public. Perhaps you are familiar with the highly decorated Officer Jack McLamb? He is also an Oathkeeper and has very strong words to use regarding the swine flu "planned demic".

We, the American people, pray that a sort of Inter Sheriff Communication be ignited by this fax campaign. We pray that you all collectively recognize your power and use it to support and defend the people in your county and at the very least your own family. Again, crucial information awaits you at **www.CallingAllSheriffs.info** . We believe you will find it empowering, esp. Sheriff Mack's book which quickly details how powerful you truly are. If you have never read this before we think you will be pleasantly surprised. The global elitists pray you never do and seek to distract you and use you for their nefarious ends knowing they can't pull it off unless you, the county sheriff, capitulate.

We, the people understand the momentous trial our country is currently facing and are ready to band together with great vigilance to save it from all aggression---foreign or domestic. We trust you understand the gravity of this message and will handle with the urgency it commands. Call on us.

In patriotic service,
Faithful and Determined Citizens of the United States
